EXPERIENCE

Customer Care Business Analyst, Qorvo, Hillsboro, Oregon

June 2026-Present

- Leveraged SAP to execute and track complex order life cycles, ensuring on-time delivery and maintaining a 100% customer satisfaction rating.
- Facilitated and expedited the execution of Non-Disclosure Agreements (NDAs), fostering client trust and accelerating the onboarding process for new accounts.
- Reviewed legacy reporting processes to conceptualize and propose dynamic PowerBI dashboards, projected to reduce manual reporting time by 25% and maximize data accuracy.

Data Integrity and Process Improvement Intern, Qorvo, Hillsboro, Oregon

May 2025-June 2026

- Led data integrity initiatives in Salesforce to enhance sales funnel accuracy and reliability by reducing historical data errors by 85.7% in targeted areas.
- Improved reporting by collaborating with sales representatives to identify and correct invalid historical data.
- Boosted data accuracy by 31.3% in targeted areas by designing and implementing a Salesforce Lightning Web Component pop-up for proactive data cleansing and incorporating stakeholder feedback for optimal usability.
- Engineered a Databricks Genie space specialized in lost sales data, automating ad-hoc reporting and providing Sales Managers with instant, reliable insights for strategic decisions.

Staff Member, Sparks Fitness Center, Salem, Oregon

August 2023-May 2026

- Collaborated with the management team to develop and implement process improvements based on client feedback through survey data collection.
- Applied data-driven insights to enhance customer service, promptly addressing and implementing customer requests to improve satisfaction and retention.

Registration Optimization Project, Willamette University, Salem, Oregon

October 2024-December 2024

- Applied Lean DMAIC methodology and root cause modeling (Pareto, supply-demand gaps) to reduce waste in university registration, identifying key drivers of operational misalignment.
- Integrated disparate stakeholder datasets to model and quantify \$32K/year in lost productivity, translating technical data gaps into tangible business costs.
- Developed a demand forecasting framework to predict enrollment needs, projected to reduce advising overhead by 15% through improved resource allocation.
